Syntactic Parsing:
Use the online Stanford Parser  http://nlp.stanford.edu:8080/parser/ to parse two sentences (the sentences should have at least 10 words), specifically:

Q1. Pick one sentence such that the Stanford Parser will provide a correct result, and write down the output in the report.

Q2. Pick another sentence such that the Stanford Parser fails to provide a correct result, then explain why does it happen and provide the correct output manually.

What to submit:
Submit a report with the proposed two sentences, the outputs of Stanford Parser and your analysis.
Due:  Oct 27th, 2017 before 4:00 pm
